**AliMed Releases 2021 Sourcebooks with 300+ New Medical Products**  
*Rehab, Orthopedics, & Skilled Nursing and Operating Room & Medical Imaging*

**DEDHAM, Mass.—Feb. 8, 2021**—AliMed, Inc., a Massachusetts-based medical supply manufacturer and distributor, announced today the release of its [2021 Rehabilitation, Orthopedics, and Skilled Nursing](#) and [Operating Room and Medical Imaging](#) Product Sourcebooks, featuring more than 300 new products across both the acute and non-acute care markets.

Many changes to this year’s catalogs reflect the demand shift for medical products used to help combat COVID-19, which have continued to be the most often-sourced supplies. AliMed addressed these critical needs with the addition of a new [Emergency Preparedness](#) category, featuring vaccine accessories, hygiene supplies, and emergency bedding, along with the expansion of its [Infection Control](#) line to add new PPE storage dispensers that provide staff and patients with immediate, facility-wide access to protective equipment to reduce infection spread.

“COVID-19 has undoubtedly altered the medical products supply landscape, and we have shifted our offering as necessary to meet that demand,” said Chief Commercial Officer Adam S. Epstein. “We remain committed to helping all our partners and customers meet the daily challenges they face by providing the products they need—when they need them—to help ensure staff and patient safety.”

Other new product highlights include the [AliMed ONE® Wireless Fall Monitoring System](#) for fall management, which allows for safer and total patient room coverage with wireless hall alerts for quicker room identification and faster staff responsiveness. Key updates to the [Diagnostics](#) section feature new [Kilogram-Only Patient Scales](#) to help reduce weight-based medication-dosing errors and [EMR-Validated Scales](#) for direct connectivity with EMR systems to reduce data transmission errors.

For more information and product details, [request a free print catalog](#) or view the newly available [eCatalogs](#).

**About AliMed, Inc.**

Headquartered in Dedham, Mass., AliMed is a specialty medical supplies manufacturer and distributor with on-site customization capabilities and a vast portfolio of healthcare products designed to improve patient outcomes and experiences. Celebrating 50 years of serving patient needs spanning “hospital to home,” AliMed has built its long history and strong reputation on responsiveness, exceptional customer service, and high-quality offerings. In 2017, AliMed was recognized as a Manufacturer of the Year by the Commonwealth of Massachusetts Legislative Caucus. Visit [AliMed.com](http://AliMed.com) for more information.
